

3D STAND UP CUT OUTS

Get ready for the upcoming holidays with your own 3D Cut Outs. Once you get it down you can start making your own!

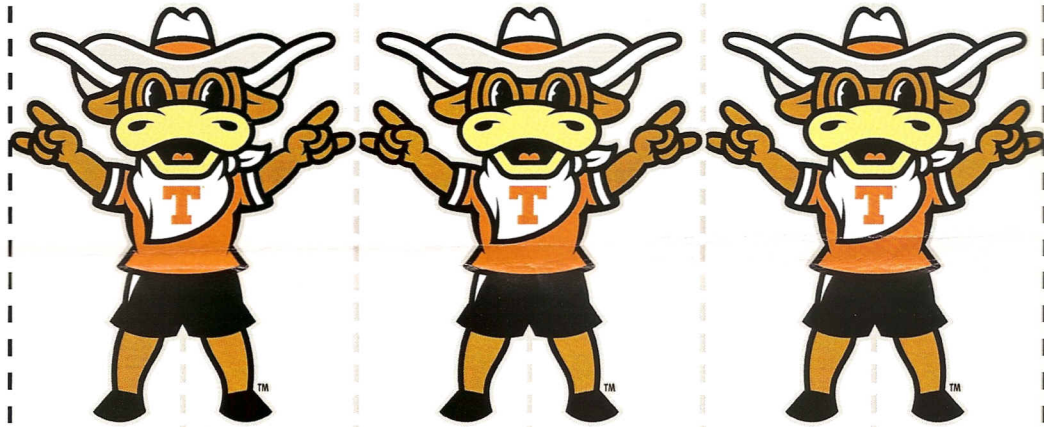

SUPPLIES:

- Scissors
- Tape

REMEMBER TO ASK FOR PERMISSION!

DIRECTIONS:

1. Cut out shamrock along the black dotted line
 2. Fold along the gray lines
 3. Cut out along the outside line (black line) of the clover.
- Note:** Make sure edge of paper does not get cut so shamrocks stay attached
4. Fold the opposite way so the middle of the shamrocks touch
 5. Tape the two ends together
 6. Repeat for Hook 'Em!

A

Digital Cable TV Is...

MAZE-ING!

To receive your favorite TV shows from Time Warner Cable, film images have to be converted to digital code and transmitted to satellites orbiting 22,300 miles above the earth, traveling at more than 1,000 miles per hour!

The satellite then has to transmit the digital signal to the large satellite dish that sits at the "headend" of the cable provider, Time Warner Cable.

Time Warner Cable sends the signal out through its fiber-optic cables to the homes and businesses that subscribe each month to our services to receive their favorite TV shows, movies, sports and other programs.

Can you help the TV studio get its program to the home TV set?
