CAMM: Students visit YNN, explore wireless world

By: YNN Staff

They may be small but they took on the challenge of "Cracking the Code in the Wireless World."

A group of summer campers from "Making Awesome Things Happen" stopped by YNN Tuesday and participated in a series of activities centered on wireless devices.

The campers learned how those devices bring together science, technology, engineering and math in a fun way. It also inspired some of the kids to think about how some of what they learned could help them find a job in the future.

"So we can work for Time Warner Cable, stuff like that and other companies and help them out and learn different stuff," sixth grader Elijah said.

YNN's parent company, Time Warner Cable, sponsors the initiative Connect a Million Minds, otherwise known as CAMM. [Click here](#) to learn more about it.
